WE HELP STARTUPS

We are in the business of helping startups succeed! Our web apps have over 6.5 million users generating over \$16 million USD in revenues for our clients. We understand how to build web apps and to make them successful, we use ground breaking technologies to achieve market disruption for our clients.

WE ARE PASSIONATE

We are in the business of helping startups succeed! Our web apps have over 6.5 million users generating over \$16 million USD in revenues for our clients. We understand how to build web apps and to make them successful, we use ground breaking technologies to achieve market disruption for our clients.

LIFE TIME SUPPORT

When your web app is delivered, you will get lifetime support for any bug fixes via one of the best collaboration tool on the internet.

ST Solutions, started in 2002 with the goal of building great Web Applications for our clients. We leveraged our programming knowledge along with our understanding of business to help customers develop world class web applications. Since the introduction of ST Solutions our company has developed Web Apps that have generated over \$16 million USD in revenues and 6.5 million users.

Our developers are young, talented and passionate about achieving success for our clients. We only hire the most talented developers to join our team, which consist of Zend Certified Engineers, high skilled a highly skilled Quality Assurance team.

Our client lists consist of startups that have entrusted us with their life savings and established companies looking for a competitive advantage. Our team of developers takes your security seriously, we take great pride in the fact that non of web apps have ever been hacked, even though we generated over 6.5 million users to our web apps.
